

651

21

Data will not be shown for counties with fewer than three deaths.

The bar chart displays the daily death toll in the UK. The y-axis, 'Number of Deaths', has major grid lines at 0, 10, and 20. The x-axis marks specific dates: Mar 24, Apr 3, Apr 13, Apr 23, May 3, and May 13. The data shows a clear upward trend starting in late March, reaching a peak of 22 deaths on April 20 and 21, followed by a period of high volatility with several days exceeding 10 deaths, and finally a decline towards the end of May.
