Data will not be shown for counties with fewer than three deaths.

The bar chart displays the daily death toll in the UK. The y-axis, 'Number of Deaths', has major gridlines at 0, 10, and 20. The x-axis marks specific dates: Mar 27, Apr 11, Apr 26, May 11, May 26, and Jun 10. The data shows a clear upward trend from late March, with a period of high mortality (peaking at 22 deaths) between late April and mid-May, followed by a decline and a final small peak in early June.

Recent deaths may not be reported yet.
