White	630	24.76
Black or African American	96	44.04
American Indian or Alaska Na	11	16.98
Asian	17	15.84
Other Race	61	66.26
Not Reported/Missing	57	

Ethnicity Death Rates per 100,000

	Ethnicity	Number of Deaths	Rate per 100,000	
	Hispanic or Latino	108	31.0	
	Not Hispanic or Latino	672	26.2	
	Not Departed/Missing	0.2		

KDHE has two processes for verifying COVID-19 related deaths. Notifications of deaths in COVID-19 patients may be reported directly to KDHE by local health departments or providers and are marked in our disease surveillance system. When the death certificate is received by the KDHE Office of Vital Statistics, we verify the cause of death and date of death in our surveillance system. In the second process, we really review COVID-19 deaths in the death registration system and update any COVID-19 deaths missing in the surveillance system, in both processes, the death certificate data is the final source of data. Therefore, the number of deaths reported here by date of death may not match the total number of deaths reported if the date of death has not been verified yet from the death certificate.
